## Relevant Experience

### Web Developer - Exceloweb Solutions

Remote Job

January 2023 to January 2024

- Developed and managed an e-commerce platform, 3ThirstyGoats, for a US-based client, specializing in online store management and digital presence.
- Handled data entry and streamlined data workflows to ensure accurate and efficient e-commerce operations.
- Ensured website performance optimization and maintained high standards for user experience and functionality.
- Collaborated with stakeholders to align the platform's design and features with business objectives

### Frontend Engineer - CareerTweakrz Inc.

Onsite

July 2024 to present

- Development and design of an AI-powered SaaS platform, specializing in ATS-optimized resume generation and job search solutions.
- Engineered key features using Next.js, TypeScript, TailwindCSS, GraphQL, PostgreSQL, and Prisma.
- Optimized frontend performance, improving page load speeds and user interactions.
- Transformed design prototypes into scalable, production-ready code, ensuring seamless integration with backend services and APIs.

### UI/UX Designer - CareerTweakrz Inc.

Onsite

September 2024 to present

- Assumed responsibility for UI/UX design, crafting intuitive and user-centric experiences for the platform.
- Designed interactive prototypes and mockups, aligning with user needs and business goals.
- Collaborated closely with the development team to ensure design consistency and feasibility in implementation.
- Conducted usability testing and incorporated user feedback to enhance design iterations.

## Education

Bachelor of Science in Software Engineering from **University of Management and Technology, Lahore**

## Interests

Artificial Intelligence, Machine Learning, Artificial Neural Networks (ANN), Artificial General Intelligence (AGI), Natural Language Processing (NLP), Deep Learning and Convolutional Neural Networks (CNN), UI/UX Designing, User experience research, usability flow, web accessibility, exploring new areas of software engineering

## Skills

### Programming Languages

Javascript (ES2023), Typescript, HTML, CSS, GraphQL

### Libraries & Frameworks

React, Next.js, Node.js, Tailwind CSS, Framer Motion, Headless UI, Prisma, Redux, Redux Toolkit

### Tools & Platforms

Git, GitHub, Vercel, Content Management System (Hygraph), Figma, WordPress, Project Management Tool (Clickup)

## Selected Projects

### CareerTweakrz

It is an AI powered SaaS. I started working with CareerTweakrz as a frontend engineer. With the passage of time as the responsibilities increase, I handle the responsibility of UI/UX Designer as well. I used to design for the SaaS and then develop what I design. I primarily have worked with next.js, typescript, tailwindcss, graphql, postgresql, prisma and many tools and technologies.

### Tintool

Tintool is a dynamic color palette generator designed to empower designers, developers, and creatives. Tintool helps users create stunning, harmonious color combinations tailored to enhance web design and creative projects.

### GlassAura | Figma Plugin

GlassAura allows designers to create glass effects for both light and dark theme backgrounds. It is an amazing open source plugin with **+11K** users worldwide

## Certifications

Create High-Fidelity Designs and Prototypes in Figma By [Google Career Certificates](#)

Build Wireframes and Low-Fidelity Prototypes By [Google Career Certificates](#)

Foundations of User Experience (UX) Design By [Google Career Certificates](#)
